

PROJECT 4: NETFLIX DASHBOARD

BARIS SUSLU

The skills I used in this project:

- Data Analysis Using Tableau
- Building Worksheets and Dashboards Using Tableau
- Designing Dashboards in line with Companies' Branding

About the Dataset:

Netflix is one of the most popular media and video streaming platforms. They have over 8000 movies or tv shows available on their platform, as of mid-2021, they have over 200M Subscribers globally. This tabular dataset consists of listings of all the movies and tv shows available on Netflix, along with details such as - cast, directors, ratings, release year, duration, etc.

For raw data please visit the following link:

Dashboard: Netflix Dashboard

For the dashboard, please visit the following link:

https://public.tableau.com/app/profile/baris2293/viz/NetflixDashboard_16774980322180/NetflixDashboard

The main objective of this project is to design a dashboard in line with Netflix's branding.

From the filters users can select desired Movies or TV shows and see the relevant information about the rating, duration (number of seasons for TV shows, minutes for Movies), date of release, date added, genre and description.

On the second part of the dashboard users can see the general analysis about the TV shows and Movies on Netflix.
